Víctor González

Brass invent

para quinteto de metales

2 Trompetas en Do

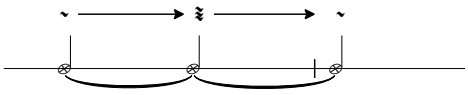

1 Trompa

1 Trombón

1 Tuba

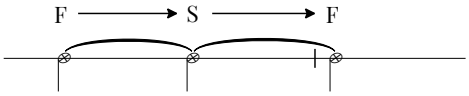

Sonido de aire, altura indeterminada.

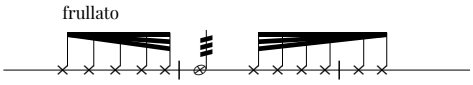

Cambiar posiciones de pistones válvulas de manera aleatoria, acelerando/frenando los cambios conforme a los símbolos/flechas.

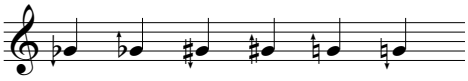

La dinámica indica la cantidad de aire; el paréntesis denota que es relativo a las posibilidades dinámicas con sonido de aire.
mf con sonido de aire es equivalente a ***p*** con sonido ordinario.

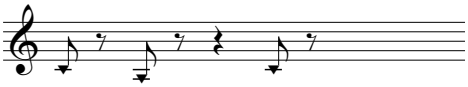

Cambiar gradualmente la consonante/vocal con la que se produce el sonido de aire.

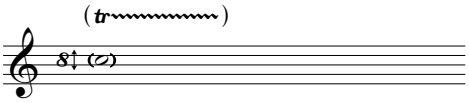

frullato acelerando/decelerando. Se puede realizar utilizando picados (simple ›› doble ›› triple ›› *frullato*).

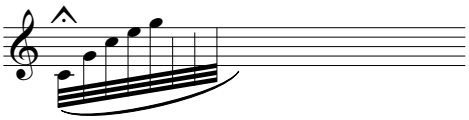

Cuartos de tono.

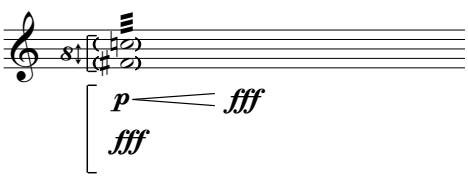

Slap. Sonido percusivo. Se puede realizar con la lengua, golpeando la boquilla con la mano o golpeando la campana con el dedo (sonido indeterminado).

Tocar la nota en cualquier octava a elección del intérprete.
Trino opcional.

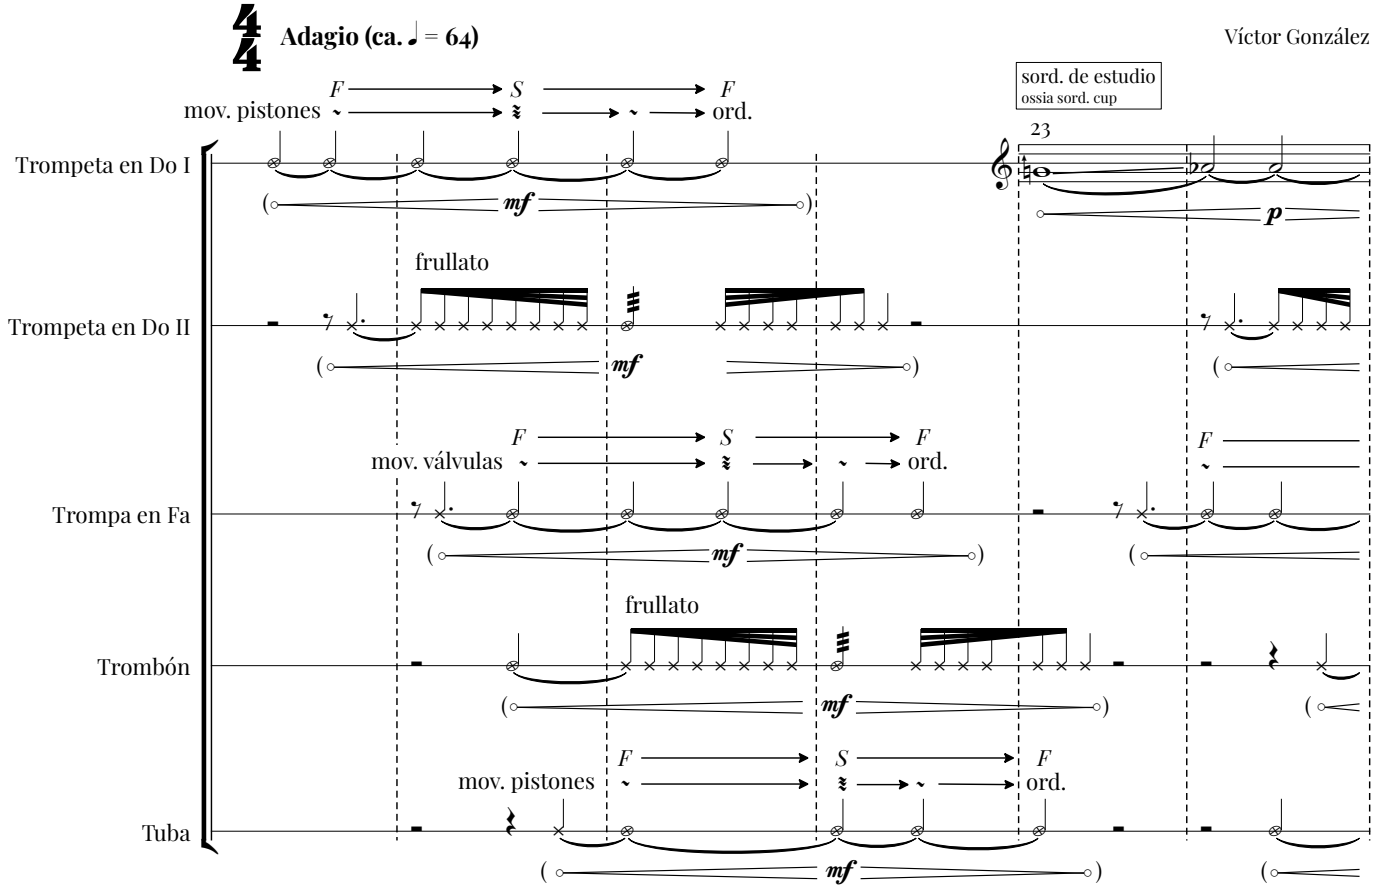

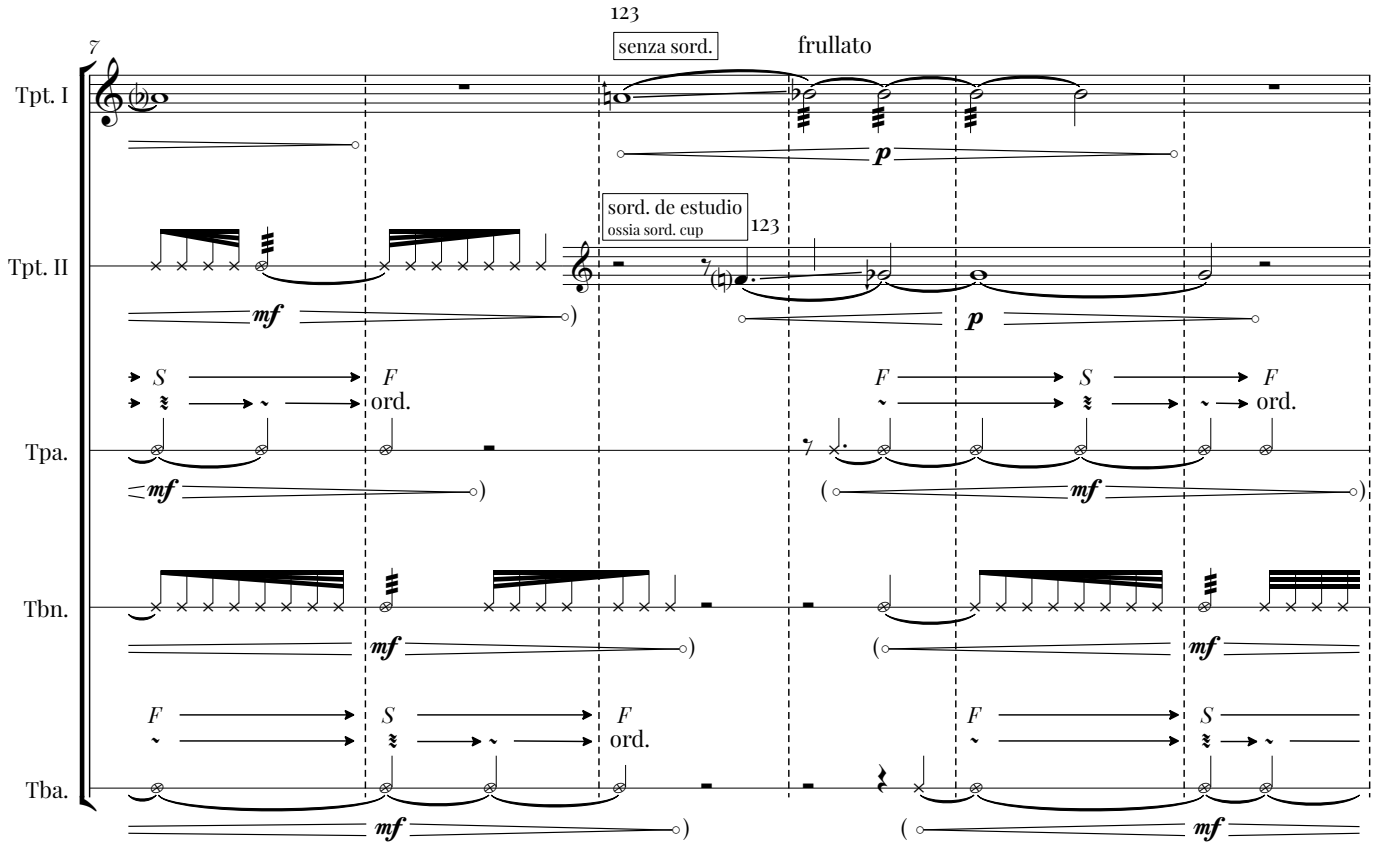

Glissando de armónicos. Con una misma posición, pasar por todos los armónicos posibles de la serie ascendentemente de manera rápida.

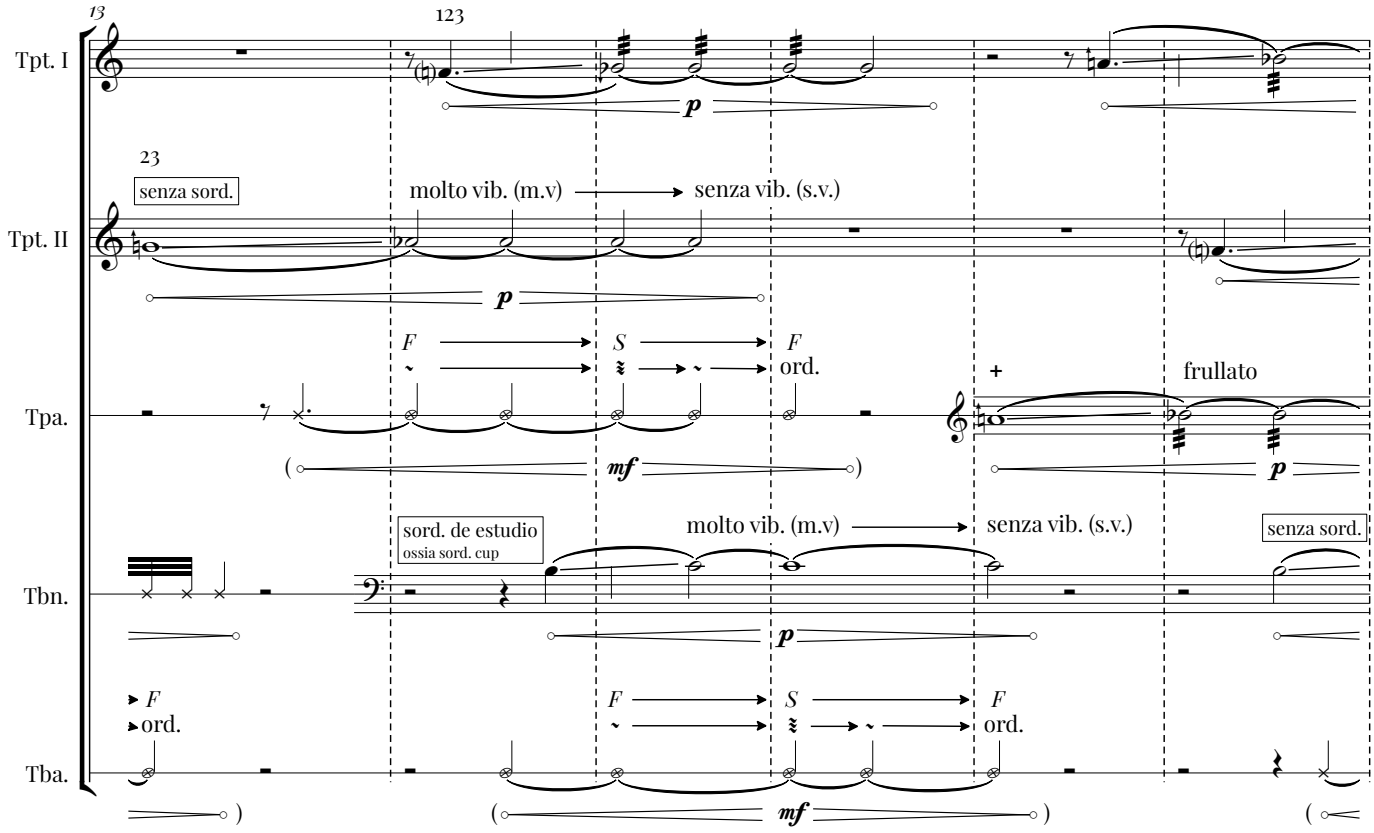

Corchete vertical indica interpretar una de las opciones, a elección del intérprete.
