Víctor González

Ese Mi parece un Mi♭

for electric fretless guitar and electronics

This whole work uses a custom tuning system (or temperament) with 19 different, non-equally spaced, sounds per octave.

The notes with their notation and their respective cents from 0 to 1200 are as follows:

0 40 122 204 262 340 400 448 496 544 623 702 760 809 858 906 970 1042 1102

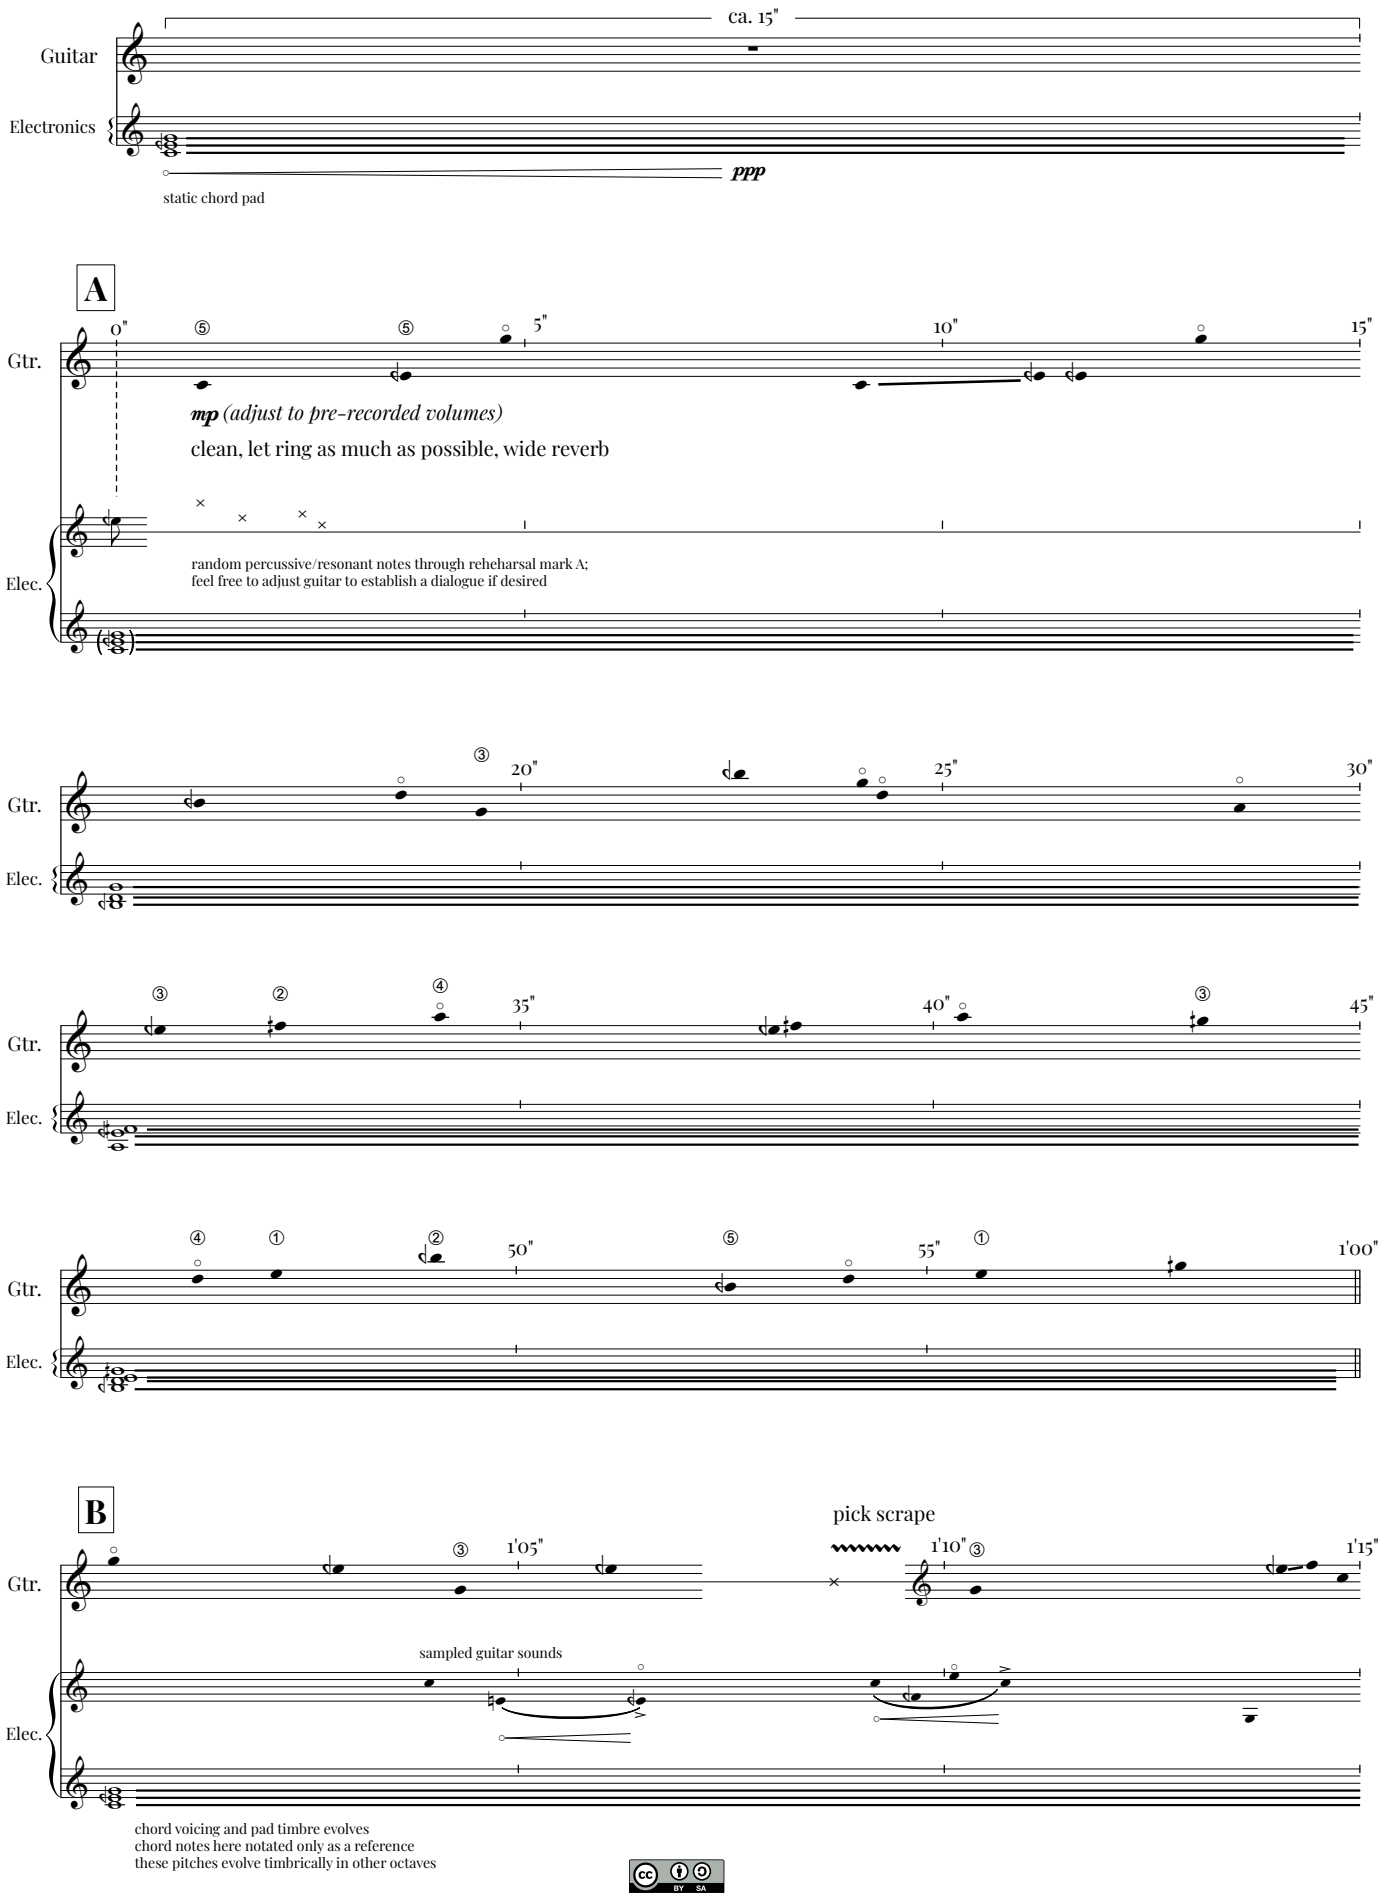

♮♯♭ Are the same (or very close) to the same note in 12-TET. For electronics, the deviation in cents is honored; for guitar it is acceptable to just play the corresponding note in equal temperament.

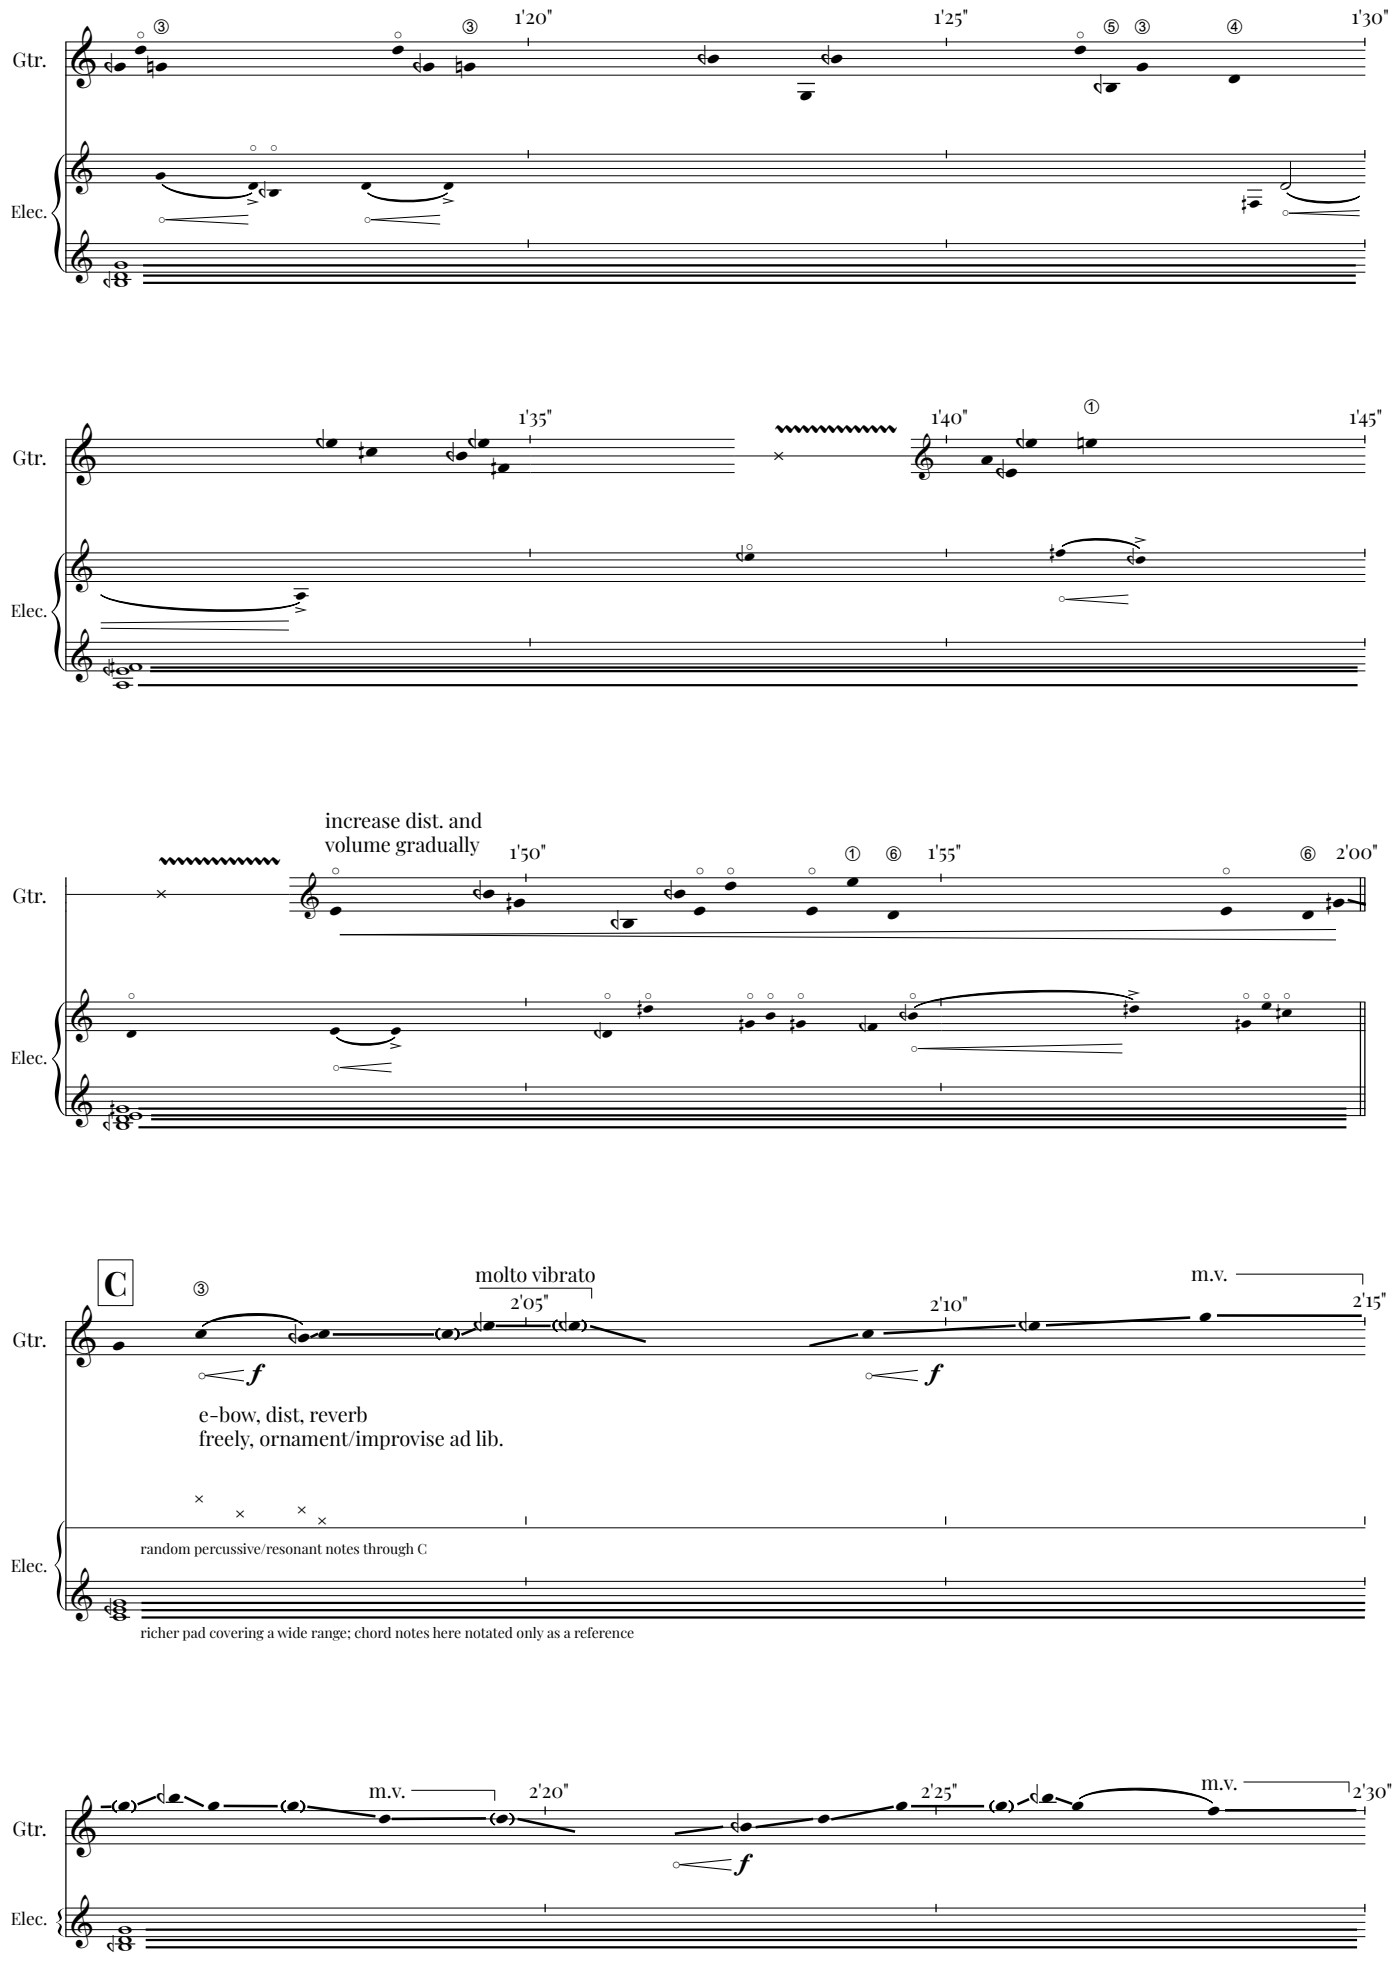

♮ Is noted here just for clarity. Across the score, any note without any accidental is supposed to be the one noted here with ♮
